Dear Mr Baughen, ( Official Secretary )

ATT; GOVERNOR GENERAL

Thank you for your reply, but there seems to be major issues where you have chosen not to redress, it should be directed to the Queens representative. The misleading false allegations that the Ministry of Justice had published and not been accountable. This was directed to my grandfather, a decorated veteran and against my family today.

The procedure when one makes a serious complaint for the security of our country needs to be redress immediately.

Her Majesty the Queen needs to intervene within the corruption of our Government Departments with the issues that's been raised.

The Queens Secretary informs us on the procedure that we must follow before the Queen can redress this herself. Through the correspondence we have followed her instructions to the T. This leads us back to you, for you are the last port of call, and not some secretary who thinks they have the authority to represent Her Majesty and the people of New Zealand. The Prime Minister is a great example, passing it on to his secretary.

Looks like we live under dictatorship. Where's our justice system under our democracy gone?

This shows me you are no different than the Government Departments that we have been dealing with over several years, as evidence speaks louder than words, or is it, the pen is mightier than the sword.

We have mentioned and produced documents of Treason where you have perverted the course of justice by hiding the evidence from the Head of State. The Government Departments in question, leading to your office are biased and seems to have a racist problem, for if we were Maori this would have been redress years ago.

You would have seen on the documents that's been supplied to the Government Departments over the years, that this falls within the heirs and successors of King George the V. The responsibility lies with the Head of State. Please read the Royal decree for our soldiers.

We can understand why you haven't addressed this, for you don't have the intelligence and knowledge of the law relating to these documents that's been supplied. This proves that the Ministry of Justice leading to the Solicitor General has the same lack of knowledge like you, so past this over to the Head of State

who can understand and have this redress.

You might like to swot up on the Treaty of Waitangi, as they seem to write their own laws when they need them, like the Ministers needing to protect themselves. ( I don't suppose you know what this law comes under?) The Discharged Soldiers Settlement Act of 1915 has also been brought up on several occasions and not been redress. State Owned Enterprise is a prime example.

How did John Key the Prime Minister at the time, have the right to conspire against the Head of State by trying to remove the Sovereign and our flag without been questioned of his loyalty to the Crown and our Country, ( is he a sleeper, a mole) and then walks away from his responsibility before his term of power terminates, then gives himself a Knight Hood without been challenged?

Not to long ago, he would have been hanged, drawn and quartered.

You have a moral duty to Her Majesty, when our heroes fought and died under the flag of King George the V and his heirs and successors of the Crown, to uphold and protect the Discharged Soldiers.

Please explain to me why the Government and the Ministers, including yourself Governor General have chosen NOT to redress the Treasonous activities which have been raised in Parliament, along with the evidence supporting the documents of proof on the 6/11/2016. ( Refer to all correspondence )

Is this what the Government are scared of today, the evidence.

Documents of proof have been provided, this includes Government Departments in question.

It is your duty to uphold the law as the Queens representative for our Queen and Country, New Zealand.

You might like to try the number for the Queens Secretary, you will find her very obliging. 0044 0207 9304 832

Please respond as soon as, for our publisher is waiting.

Yours sincerely  
Tanya Peterson
