Dear Baughen,

Thank you for your reply, but there seems to be major issues you have chosen not addressed. Misleading false allegations that the Ministry of Justice had published, this was directed to my grandfather, a decorated veteran and against my family today.

The procedure when one makes a serious complaint for the security of our country needs to be addressed immediately.

Her Majesty the Queen needs to intervene within the corruption of our Government Departments with the issues that's been raised. The Queens Secretary informs us on the procedure that we must follow before the Queen can address this herself, as you can see through the correspondence we have followed her instructions to the T. This leads us back to you for you are the last port of call, and not some secretary who thinks they have the authority to represent Her Majesty and the people of New Zealand. Prime Minister is a great example, secretary passing it on, like you.

This shows me you are no different than the Government Departments that we have been dealing with over the last several years, as evidence speaks louder than words, or is it the pen is mightier than the sword.

We have mentioned and produced documents of Treason and you have perverted the course of justice by hiding it from the Head of State.

The Government Departments in question leading to your office are biased and seems to have a racist problem, for if we were Maori this would have been redressed years ago.

You would have seen on the documents that's been supplied to the Government Departments over the years, that this falls within the heirs and successors of King George the V. The responsibility lies with the Head of State.

Please read the Royal decree for our soldiers.

We can understand why you haven't addressed this for you don't have the intelligent s and knowledge of the law relating to these documents that's been supplied. This proves that the Ministry of Justice leading to the Solicitor General has the same lack of knowledge like you.

You might like to swat up on the Treaty of Waitangi as they seem to write their own laws as they need them, like your Ministers seem to do to financially benefit themselves. (I don't suppose you know what this law comes under?) This law has also been brought up on several occasions and not addressed. State owned enterprise is a prime example.

How does a Prime Minister have the right to conspire against the Head of State by trying to remove the sovereign and our flag without questioning his loyalty to the Crown, or was he a sleeper, (Mole) at the expense of the people of New Zealand which you have a moral duty to Her Majesty, when our heroes fought and died under the flag and for the heirs and successors of the Crown, then give himself a Knight Hood without been challenged.

Not to long ago, in my fathers life time, he would have been hanged, drawn and quartered.

Is this what the Government are scared of today? Documents of proof have been provided, this includes Government Departments in question. It is your duty to uphold the law, as the Queens representative for our Country, New Zealand.

You might like to try the number for the Queens Secretary, you will find her very obliging. 0044 0207 9304 832

Yours sincerely
Tanya Peterson
